

BUDDSTEEL
ARCHITECTURAL PRODUCTS LTD

Buddsteel Solid Phenolic Locker Doors

Product Specifications

1. Manufacturer

Locker doors shall be manufactured by **Buddsteel Architectural Products Ltd.**, a Canadian manufacturer specializing in architectural locker and partition solutions.

2. Materials

- Doors shall be constructed of solid phenolic material with a decorative surface finish.
 - Material shall carry a **Class A fire rating for school hallway installations**.
 - Core shall consist of a solid, self-supporting black substrate engineered for strength and durability.
-

3. Fabrication

Door Construction

- Finished door thickness: **1/2" (12.7 mm)**
 - Doors shall be manufactured as **single-tier** unless otherwise specified.
 - Surface finish shall be durable, impact-resistant, and suitable for high-traffic institutional environments.
-

4. Hardware

Each locker door shall be factory prepared and supplied with:

- Heavy-duty **continuous hinge**
- Factory-installed recessed pocket pull, suitable for padlock-style locking
- Reverse-engraved **black plastic number tag**

All hardware components shall be suitable for long-term institutional use.

5. Mounting Style

- Phenolic doors shall be **proud mounted** to the locker frame.
- Doors shall extend **1/2" above and 1/2" below** the locker frame opening to ensure consistent visual alignment and enhanced durability.

6. Colour Selection

- Colours shall be selected from the current **Wilsonart standard range**.

7. Installation (Existing or New Locker Bodies)

- New phenolic locker doors shall be secured to locker frames using **pop rivets and self-tapping screws**.
- Hasps shall be fastened using **two self-tapping screws**.
- Installation shall be performed by personnel experienced and specifically trained in locker door replacement and installation.
- Doors shall be installed **true, level, and plumb**.
- Number tags shall be installed in accordance with the approved layout.
- Upon completion, all work areas shall be left clean and free of debris.
