

BUDDSTEEL
ARCHITECTURAL PRODUCTS LTD

METAL LOCKER DETAILS:

Locker Bodies are manufactured from 24 ga cold rolled steel.

Frames are resistance welded on all four corners to form a rigid structure.

Doors are of an all welded double pan construction.

Lockers maintain strength through the use of pop rivet assembly. In addition to the strength in the construction of the Clean-Line Lockers all parts are coated with a high quality thermo set powder paint prior to assembly, ensuring years of lasting durability.

Locker Interior:

Single Tier Lockers include one hat shelf and three coat hooks.

Double Tier, Triple Tier Portoclub Lockers include two coat hooks per compartment.

Locker Interior:
